# About the Company

At Coreline Engineering Solutions, our commitment to excellence is underscored by our key highlights: We specialize in delivering expert design services that not only set industry benchmarks but also drive innovation within the telecommunications landscape. With our roots firmly grounded in South Africa, our unique and diverse perspective enriches our approach to global telecommunications challenges. Our solutions have a far-reaching impact, connecting local communities and international businesses alike, fostering growth and connectivity. Our legacy of success positions us as industry leaders, consistently delivering cutting-edge solutions that propel telecommunications into the future. As we invite you to engage with our team, explore collaborative opportunities, and witness the transformative impact of our forward-thinking design services, we collectively embark on the mission to build a connected future where innovation knows no bounds and communities thrive on the power of seamless connectivity.

# OUR SERVICES

At Coreline Engineering Solutions, we excel in delivering customized fiber network design solutions that cater to the specific requirements of our clients. Our team of skilled professionals possesses expertise in various areas, allowing us to offer a comprehensive range of services, including:

- **Network Design:** Our specialization lies in crafting customized fiber network designs from A to Z, ensuring they align precisely with the requirements and objectives of our clients.
- **Network Inventory Management:** We are proficient in documenting and capturing the details of fiber network infrastructure, maintaining an accurate and up-to-date inventory for effective management.
- **Software Systems Design and Databases:** Leveraging our technical proficiency, we design software systems and databases to streamline operations, enhance efficiency, and facilitate seamless data management
- **Dedicated Admin Personnel:** Our dedicated admin personnel oversee and coordinate various aspects of project administration to ensure projects are executed smoothly, on time, and within budget.
- **Material Guidance and Supplier Advisory:** Providing valuable insights, we offer guidance on materials and advise on suppliers, ensuring the use of quality materials in the implementation of fiber network projects
- **Field Surveyors:** We deploy experienced field surveyors equipped with the necessary skills to conduct surveys, gather crucial data, and assess on-site conditions for effective project planning.

# CLIENT ONBOARDING

1

## INITIATION & CONCEPTION

- Define Specification need required by the client.
- Specify the expected outcomes and benefits.
- Research and document relevant regulations and standards
- Obtain available data from client
- Identify potential risks and challenges.

2

## PLANNING

- Analyze data
- Clearly define the scope of work for the fiber design project.
- Include deliverables and exclusions
- Define quality standards for the fiber design
- Finalize Project Deliverables needed by the client

3

## LAUNCH & EXECUTION

- Define and finalize Commercials
- Allocate and introduce account manager and team to the client.
- Define and Finalize Communication Plan
- Conduct team orientation and training.

# CLIENT ONBOARDING

4

## MONITORING & CONTROL

- Quality of deliverables
- Establish a process for identifying and resolving project constraints.
- Conduct regular quality inspections.
- Develop a protocol for handling changes to the project scope.

5

## PROJECT COMMENCEMENT

- Compile project documentation and ensure it's accessible.
- Plan for a smooth handover to the client's Project Management Team
- Provide training to end-users
- Establish ongoing support mechanisms.
- Conduct a project evaluation and gather feedback.
- Establish a lessons learned register for future projects.

# LEADERSHIP TEAM

## LEVI ODENDAAL

Managing Director

With over a decade of experience as a project manager, design manager, cost accountant, and consulting engineer in the Telecommunications industry, Levi have successfully led major fiber projects in South Africa and the UK. His unwavering work ethic serves as a constant source of inspiration, driving the success that has positively impacted my clients' achievements. He is passionate about delivering results and contributing to the continued growth of the industry.

## GUSTAV HUNSINGER

Chief Technical Officer

A seasoned expert with over 11 years of success in fiber optic design, backend database systems, and automation. His career is a testament to the seamless integration of diverse expertise, crafting innovative and scalable solutions for numerous clients around the world.
